SAM RAHNEMAYAN

EPFL Robotics Engineer

Master of Science MSc

Minor in Management, Technology
and Entrepreneurship

SUMMARY

I am Sam, an EPFL Robotics graduate with a background in Microtechnology and a Minor in Management. Specialized in biomechanics and autonomous systems, I have a proven track record of developing clinical diagnostic tools and high-performance control algorithms.

ACADEMIC CURRICULUM

Master Thesis at EPFL/UTS (2025 - 2026)

Master's in Robotics at EPFL (2022 - 2026)

Bachelor's in Microengineering at EPFL (2019 - 2022)

INTERNSHIP IN AUTONOMY

- Coordinated the hardware-software integration for a medical rehabilitation device.
- Developed a virtual game to utilize the device.
- Collaborated in a startup environment to improve product reliability and user experience.

CO-FOUNDER MEDICA-FAST

- Engaged with medical professionals to gather clinical requirements for diagnostic tools.
- Handled business development by creating a business model.

PROGRAMMING

Python, MATLAB, C++, C#, C, RStudio, Git

SIMULATION & DESIGN

- Mechanical Design: Fusion 360, KiCad, SolidWorks
- Physics Simulation: MuJoCo, Webots, OpenSim
- Optimization: Gurobi, Casadi, YALMIP
